Color Table GF21

The Color Table GF21, made of colored MDF, was originally designed for the 2021 Grande Fratello House. Its precise chromatic surfaces and contemporary design give the piece a distinctive aesthetic, while the solid structure ensures quality and durability. Versatile and visually striking, it enhances modern residential interiors and contract spaces with style, coherence, and personality.

“Radici” Table

The Radici Table, crafted from birch plywood and sculpted with CNC milling to achieve a high-precision three-dimensional geometry, integrates a functional tray designed to make practical use of the surface. Compact and contemporary, it highlights the material quality of wood and offers a furnishing solution that combines design, performance, and manufacturing excellence, distinguished by meticulous detailing and a strong aesthetic identity.

“Chocolate” Table

The Chocolate Table is made of okoumé wood and features a three-dimensional surface created through high-precision digital machining. The integrated tray enhances functionality, making the piece particularly suitable for contract settings, lounge areas, and hospitality environments. Its compact structure and contemporary design emphasize the material richness of the wood and the clean aesthetic of the surface, offering a furnishing solution that blends design value, functional practicality, and manufacturing excellence.

design by Medaarch

Blooming Table

Blooming Table features a contemporary structure defined by precisely sculpted floral geometries supporting a tempered-glass top that enhances brightness and visual clarity. Its design combines a distinctive territorial identity with modern craftsmanship, offering an aesthetic suitable for residential interiors and contract spaces. The piece expresses a balance of elegance, structural solidity, and refined detailing, ideal for those seeking furnishings with strong design character and high production standards.

Metal Stool

These stools, available with solid-wood or metal structures, are crafted using artisanal and high-precision digital techniques to ensure stability, strength, and long-lasting durability. Essential lines and natural finishes highlight the material quality of the wood and the clean aesthetic of the metal, making them ideal for residential, hospitality, and contract environments. Designed according to principles of ergonomics, proportion, and comfort, they adapt easily to both modern and traditional interiors. Each piece reflects attention to detail, aesthetic identity, and manufacturing excellence, where artisanal tradition meets contemporary production processes.

COLORS

Shadow Stool

A modern alternative version features metal legs arranged to emphasize the natural irregularity of the wooden axes (branches) embedded in the trunk section. The black sheet-metal base conceptually evokes the shadow cast by the sun at noon, giving the piece a distinctive and contemporary character.

COLORS

Stool Gold

The seat, equipped with a swivel mechanism, is made of birch plywood and shaped like a cut tree trunk, reproducing the growth rings and suggesting the idea of a "second life" for the material.

COLORS

Benches

Benches crafted from solid wood or multi-layer plywood in various species, shaped according to the design through high-precision digital techniques. The wooden or metal legs reinterpret styles of objects from the past. Organic forms draw inspiration from soft objects such as cushions, transforming wood into welcoming and contemporary volumes.

Matera Capitale Mediterranea
della Cultura e del Dialogo 2026

Ritaglio

Made from a cerro wood trunk, this piece features a seat carved and shaped directly from the solid mass. The legs, crafted from reclaimed fir offcuts, transform leftover materials into structural elements with an authentic, tactile character.

Object

Tronco Lucano

Coffee table in solid chestnut wood, featuring a stepped, hand-finished sculpted top. The base, made of metal sheets, is lightened by a central clamp that creates a visual contrast between the solidity of the material and an ethereal, dematerialized effect. The piece evokes the image of a tree supporting a form emerging from the earth, with natural irregularities that enhance its sculptural character. Designed for multiple settings thanks to its versatile shape and dimensions.

Geometric artist Wall Art

Geometric Artist Wall Art showcases a unique fusion of abstract design and natural materials, with wooden wall panels defined by bold geometric shapes that create striking visual compositions. Each piece is meticulously crafted to highlight the beauty of wood grain and its natural patterns. Ideal for adding a touch of modern elegance and refined artistic expression to any environment, these wall art pieces are perfect for living rooms, offices, or any space requiring a stylish focal point.
